        "#Loksabha Election 2019 Data Analysis in India\n",
        "The Lok Sabha, or House of the People, is the lower house of India’s bicameral Parliament, with the upper house being the Rajya Sabha. Members of the Lok Sabha are elected by an adult universal suffrage and a first-past-the-post system to represent their respective constituencies, and they hold their seats for five years or until the body is dissolved by the President on the advice of the council of ministers. The house meets in the Lok Sabha Chambers of the Sansad Bhavan, New Delhi.\n",
        "\n",
        "

\n",

"\n",

"The maximum membership of the House allotted by the Constitution of India is 552 (Initially, in 1950, it was 500). Currently, the house has 543 seats which are made up by the election of up to 543 elected members and at a maximum. Between 1952 and 2020, 2 additional members of the Anglo-Indian community were also nominated by the President of India on the advice of the Government of India, which was abolished in January 2020 by the 104th Constitutional Amendment Act, 2019. The Lok Sabha has a seating capacity of 550.\n",

"\n",

"

\n",

"\n",

"A total of 131 seats (24.03%) are reserved for representatives of Scheduled Castes (84) and Scheduled Tribes (47). The quorum for the House is 10% of the total membership. The Lok Sabha, unless sooner dissolved, continues to operate for five years for time being from the date appointed for its first meeting. However, while a proclamation of emergency is in operation, this period may be extended by Parliament by law or decree."

"From the description given below, we can see that the mean of the crime among contestants is 1.45 where as the minimum crime,25% and 50% contestants did not make any crime but sadly in 75 % of total candidates the crime rate became 1.0. More surprisingly the maximum crime conceived by a person is 240,that's huge."
